## **QuestaWeb Applications Now Support All Four Major Browsers**

*User Experience Is Identical across Browsers and Devices*

**Clark, N.J. -- August 7, 2014 --** QuestaWeb, Inc. ([www.questaweb.com](http://www.questaweb.com)), a premier provider of web-based, integrated Global Trade Management (GTM) solutions, announced today that its suite of TradeMaster<sup>QW</sup> applications complies with the latest version of the HTML5 standard. This comprehensive update includes cross-browser compatibility. QuestaWeb applications are now compatible with Internet Explorer 8-11, Google Chrome, Mozilla Firefox and Apple Safari. Users can therefore expect the same experience regardless of the browser or device employed.

The rollout to QuestaWeb customers follows some 6 months of programming effort retooling both client-side and server-side coding. Customers who have already transitioned are extremely pleased with the result.

In addition to the obvious benefits the transition affords customers, QuestaWeb can now take advantage of many more open source projects. QuestaWeb can better leverage the functionality of JavaScript to incorporate new features as well as use AJAX's asynchronous processing capabilities to create fast, dynamic web pages.

Michael Hayes, HTML Project Leader, QuestaWeb, said, "QuestaWeb prides itself on forging new pathways in the GTM software space. Recognizing how important it is to our customers and their staffs to be able to work from remote locations using in-place technology and their desire to update in-house systems to 2014-era browsers, we expended the considerable resources necessary to research, test and transition our applications. We believe QuestaWeb is among the first vendors to take this step. Looking toward the future, QuestaWeb is already

exploring a move into the world of mobile browsers and touch-friendly websites. We hope to one day achieve the same level of success in the mobile world that we have already accomplished on the desktop level.”

### **About QuestaWeb**

QuestaWeb is a premier provider of integrated, web-based global trade management software solutions. The firm’s business model unifies import, export, logistics, compliance and financial processes including U.S. Customs clearance, landed costs, Harmonized Tariff Schedule classifications, export licensing, denied party screening, quota management, product catalog, tracking, event management and international document repository. The centralized global database maintains up-to-date compliance content and supports multiple languages, currencies and time zones. QuestaWeb was one of the first companies certified by U.S. Customs for ABI electronic connectivity initiatives and the first ACE-certified vendor. The company’s flagship product, [TradeMaster](#)<sup>QW</sup> Global Trade Management System, proactively manages export and import processes for importers, exporters, brokers and forwarders. It accelerates the flow of goods across the global supply chain, reduces inventory and operational costs and ensures compliance with ever-changing cross-border regulations. To learn more about QuestaWeb, please visit [www.questaweb.com](http://www.questaweb.com) or call 908-233-2300.
